BIG DATA TAKES ON LEGIONELLA

Powered by Australia's most respected and experienced water treatment provider, HydroChem, and fuelled by your own data, Clarity is a world first innovation in the use of **big data.**

This new online app will change the way you view your portfolio's water health.

INNOVATION + DATA = CLARITY

360° dashboard view of your portfolio

Your portfolio health dashboard is the first thing you will see when you enter Clarity. A summary of your portfolio results are displayed:

- Asset health
- Environment health
- Water efficiency
- Compliance

Each category is clearly ranked out of 100 and these four elements combine to provide an overall Portfolio Health score. From this dashboard, you can then drill directly down into specific asset details.
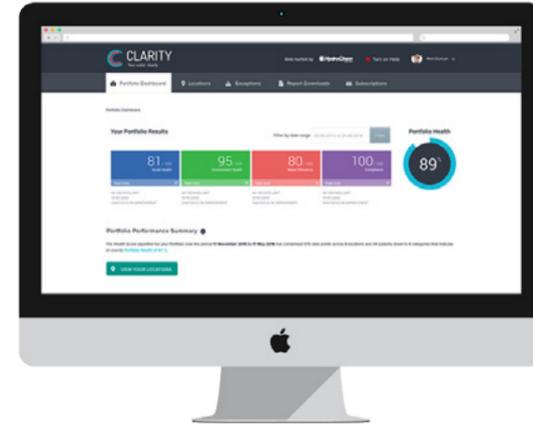

On demand reporting aids compliance

Clarity delivers expanded reporting capabilities to ensure you always have access to the information you need, when you need it. Producing compliance documentation in the event of a Legionnaires' outbreak in your region is just a few clicks away.

You have fast access to reports for each and every location and asset via the reporting dashboard. These reports can be filtered by location and date that will allow you to download your PDF files individually or collate them into one zip file.
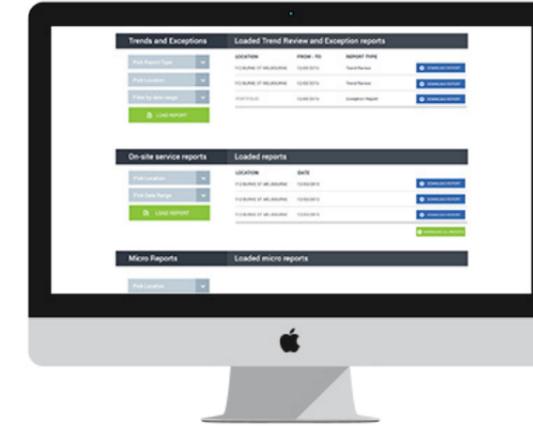

24 hour access from any device

Clarity was designed with input from our loyal client base that demanded ease of use. No matter what device you choose to use, Clarity will display your data effortlessly.

Whether you are out in the field, on the road or at your desk you will be able to log in, view the health of your portfolio at a glance and download all of your reports with a couple of clicks.
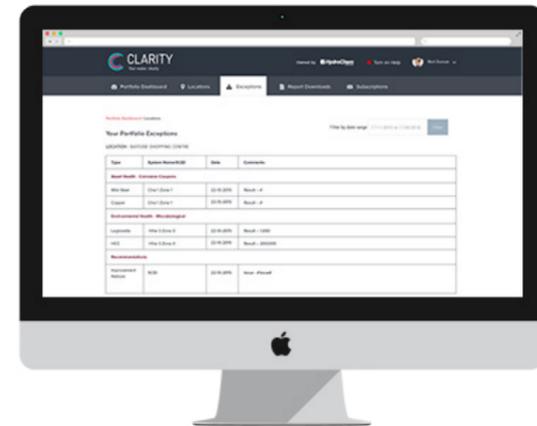

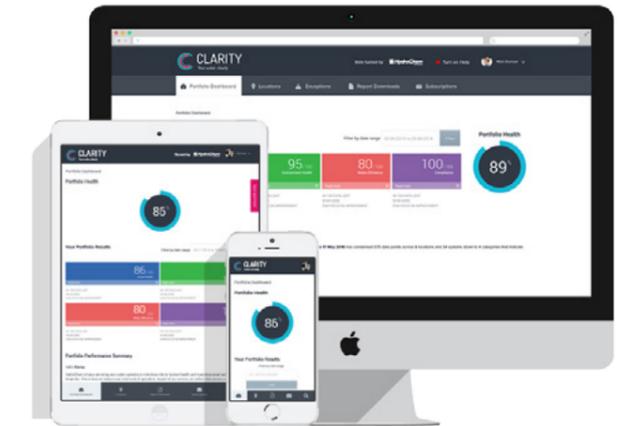

Identify critical issues with real-time data

Major exceptions across all locations and assets are a click away via the exceptions reporting tab and can be easily filtered by date. You can quickly identify the main factors that are outside acceptable parameters, and take immediate action to help minimise or resolve exceptions.

Clarity's smart functionality eliminates the need to review individual reports and will save you countless hours.
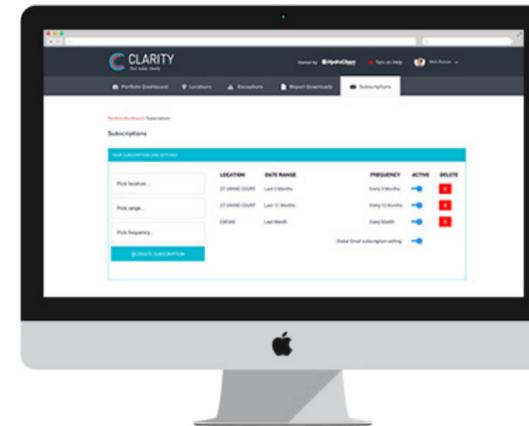

Subscription reporting directly to your inbox

You can visit the subscription tab to create your report subscriptions. Simply select your desired report then set by location, date range and frequency.

Once set up, your reports will run at specific intervals, and will arrive on time in your inbox.

About HydroChem

HydroChem is an Australian original. Started as a small family business in 1977, the company has grown to employ over 170 people across Australia and continues to expand into the Asia Pacific region.

Built upon founding principles of delivering unparalleled customer service and a commitment to developing and deploying cutting edge technology, HydroChem remains the Australian leader in water treatment.

HydroChem remains the only Australian water treatment company that offers its customers the peace of mind of externally audited Quality, OHS and Environmental accreditation in all states and territories.
