

ENVIRONMENT PROTECTION POLICY

We are committed to minimising the possibility of any adverse effects on the environment as a result of activities carried out by HydroChem. We will meet or exceed all applicable laws and regulations relating to environmental matters.

To achieve this we will strive to:-

- Provide the support required to maintain an environmental management system based on Australian Standard 14001 as a minimum;
- Review Environment Management System and objectives to ensure continual ongoing improvement;
- Implement procedures to ensure compliance with relevant statutory and other requirements;
- Develop and implement appropriate training programs for employees;
- Include environmental issues in the planning of new facilities and the introduction of new processes and products, with a view to reducing or eliminating emissions and discharges;
- Test the various methods of disposal to ensure their appropriateness;
- Recycle by-products as much as it is economically viable to do so;
- Require all employees, contractors and subcontractors to exercise responsibility for taking care of their work environment;
- Continue to seek the most efficient methods of production and product use;
- Seek to prevent pollution and manage our waste in a manner to safeguard the community, environment and workplace.
